

Rules of the Game

- Welcome to Ultimate Hangman - a two player competitive game of guessing a secret word!
- You will be welcomed with the opening page when starting the game - make sure you have clicked your cursor in the text area underneath the prompt "Press Enter"
 - Press enter to open the game menu
 - For this entire game, the way you will make a move is to type your input, and hit enter. It should always be two buttons: 1) Input character, 2) Enter
- The game menu will ask if you want to play single or two player: underneath the prompt, type the number of the option and hit enter.
 - Note: If you type an invalid input, the game will not allow you to submit it. Delete your input and type a valid character.
- After Selecting which game mode you want to play, you will be prompted to select what theme you want to play: The theme you choose will result in words relating to that theme to be chosen. Type the number of the option you want and hit enter.
 - Option 1: Christmas Themed
 - Option 2: Sports Themed
- After the theme selection, you must hit enter one more time to begin the game
- When the game begins, a display will appear on the screen:

[illegible]

```
Lives: 6
Available Letters: A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
-----
Guess a letter
```

- The display will have a hangman gallows, a lives counter, the letters available to choose from, a display showing how many characters the word has, and a prompt to guess a letter, in order of appearance
- Below the prompt to choose a letter, type in a single letter, either upper or lower case, and hit enter.
- Once the letter is picked the user will either get it right and a letter will be placed on our hangman board or they will get it wrong, and a piece of the “hangman” will go on the board.

[illegible]

- 6 Lives Left Example of correct guess

[illegible]

- 5 Lives Left Example of incorrect guess

- Players will alternate taking turns until one of two things happens:
 - 1. A Player runs out of lives.
 - Should a player 1 run out of lives and player 2 have multiple lives left, player 2 wins.
 - 2. A player solves the puzzle.
 - If a player finds all the letters to the secret phrase/word before running out of lives and before their opponent solves, the player wins.
- Those are the two scenarios that end the game; however, there is another outcome other than one player winning and another losing.
 - This outcome is a draw. Because the nature of this game being a turn-based game, there is a chance that the game ends with both players having the same number of lives left. Player 1 always begins, so in theory, if player 1 ran out of lives, and player 2 had 1 life left also, player 2 could win without casting their final guess. To remedy this, both players have to have completed the same number of turns before the game ends. This allows for ties between players.

- Once the game ends, the screen will display the winner of the game (or it will say it's a draw should that be the case), then it will show what the secret phrase was.

Player 1 Wins!
The secret phrase was CHRISTMAS LIST
